Abstract (en)

[origin: WO2021122410A1] The invention relates to a viewing method configured to allow the user to select visually altered content (311) to be revealed displayed on a screen (5) of an electronic device. Said viewing method comprises a forming step carried out so as to form a discovery area (52) of the screen (5) in which said visually altered content (311) is displayed; and a display step carried out so as to display, in a display area (56) of the screen (5), only original digital content (31) that corresponds to said visually altered content (311). The display step carried out in the display area (56) is performed according to the formation of the discovery area (52).
