Abstract (en)

[origin: WO2021123512A1] The invention concerns a system for sharing geolocation data between a navigation aid system (106) of a vehicle (101) and a first communicating terminal (103) remote from the vehicle (101), the system comprising: - the first terminal (103) comprising means for acquiring and means for transmitting first geolocation data to a second terminal (102), - the second terminal (102) comprising means (204) for receiving the first geolocation data, and means (205) for transmitting, to the navigation system (106), the first geolocation data and a command to modify a destination parameter of the navigation system (106), - the navigation aid system (106) comprising means for receiving the first geolocation data and the modification command, and configuration means for using the first geolocation data as a destination parameter.
