Abstract (en)

[origin: WO2021122624A1] The invention relates to a plug module for receiving at least one contact element having an overmold, comprising at least one receiving chamber for a contact element, wherein the plug module has at least one latching hook adjoining the at least one receiving chamber, which latching hook corresponds with a latching shoulder of the contact element to be received, such that the contact element can be locked in the receiving chamber. The invention furthermore relates to a contact element corresponding to the plug module, said contact element having an overmold and at least one latching shoulder and a plug connection formed from plug modules and contact elements.
