Abstract (en)
Disclosed is a washing machine (100) comprising a stationary drum (110) comprising at least one first opening (115). The washing machine further comprises an inner drum (120) rotatably arranged around an axis of rotation A inside the stationary drum. The inner drum comprises a second opening (125) for accessing an interior of the inner drum, a hatch (130) configured to cover the second opening, and a locking mechanism (430) configured to secure the hatch in a closed position. The washing machine further comprises at least one first safety element (140) extending across the at least one first opening, wherein the at least one first safety element is arranged to provide a sliding surface.
