Abstract (en)
[origin: WO2021129946A1] A booster seat (10) for a child that with a footprint has a base (28) provided with at least one of: a set of stabilising feet (50-56) having use positions including a retracted position and a laterally extended position in which the stabilising feet are laterally extended with respect to the base (28) to increase the footprint; and a set of height increasing feet (64-70) that have use positions including a retracted position and a height increasing position in which the height increasing feet are downwardly extended with respect to the base to raise the base with respect to a surface supporting the booster seat. The booster seat also includes an actuator operable to move the feet between their use positions.
