Abstract (en)
[origin: WO2021130179A1] The invention relates to a game device (1) comprising: a display surface (2); a playing space (8) assigned to the display surface (2); a sensor system (3) which is designed to detect an impact point (11) of an object (6) on the display surface (2); a detection system (4) which is designed to detect the position of the object (6) and/or a player (5) in at least one portion of the playing space (8); and an arithmetic unit (15) which is designed to determine a target field (7) on the display surface (2) using the aforementioned position; wherein the game device (1) is designed to display the target field (7) on the display surface (2) and to ascertain whether the impact point (11) is in the target field (7).
