Abstract (en)
[origin: WO2021130026A1] The invention relates to a quick clamping device for positioning an accessory device (17) on a hand-held power tool (13), in particular on an angle grinder, comprising a drive output unit (33) for moving the accessory device (17) about a drive output axis (A) of the drive output unit (33) and comprising a retaining unit (37) for retaining the accessory device (17) on the hand-held power tool (13), which retaining unit, more particularly, has a retaining element (39). According to the invention, the retaining unit (37) has a retaining parameter, which changes in a retaining state, in particular in the event of a transition from a retaining state to a clamping state.
