Abstract (en)

[origin: WO2021133282A1] The invention relates to a composite material (10) comprising a polyurethane base material 2 of 55 to 94 wt% and a coating (1) of 6 to 45 wt% provided to all surfaces of the said base material (2) and a binder of 11 to 19 wt%. The produced composite material (10) is waterproof, anti-bacterial, anti-static, nonslip, resistant to impacts, has high tear and tensile strength, high abrasion resistance, high chemical resistance and is suitable for outdoor conditions.
