Abstract (en)
[origin: WO2021130098A1] The invention relates to a method for producing a component which is intended for storing or distributing compressed gas (34) and has a core material (22) comprising aluminium or an aluminium alloy, wherein the core material (22) is coated on the compressed-gas side (28) with a ductile aluminium alloy (24) and/or pure aluminium. The invention also relates to a component which is intended for storing or distributing compressed gas and has a core material (22) comprising aluminium or an aluminium alloy, wherein the core material (22) is coated on the compressed-gas side (28) with a ductile aluminium alloy (24) and/or pure aluminium.
