Abstract (en)  
[origin: WO2021129964A1] The invention relates to a powder with particles made of a lithium ion-conducting material, to lithium-ion conductors comprising said powder, and to a method for producing same. The invention also relates to the use of the lithium-ion conductors according to the invention, in particular in separators, anodes, cathodes, batteries, and rechargeable batteries. In particular, the invention relates to solid-state ion conductors for use in batteries, in particular lithium batteries, and to a method for producing same.
