Abstract (en)
A closure of a textile product is provided. The textile product comprising a first (10) and a second textile surface (20) , both said first (10) and said second textile surface (20) having a first side (11, 21) facing the same direction. The second textile surface (20) has an edge. A first textile strip (30) is coupled to the first side (11) of the first textile surface (10) and extending beyond the edge (22) of the second textile surface (20) over the first side (21) of the second textile surface (20). The closure is characterised in that the first textile strip (30) is provided with at least one resilient means (31, 32, 33), holding said first textile strip (30) in front of the first side (21) of said second textile surface (20).
