Abstract (en)

[origin: WO2021137112A1] Apparatus for working, in particular bending, wire-like material, characterized in that it comprises: • - a gripping and feeding unit 100 for gripping and feeding one or more sections of wire 1, designed to grip one or more sections of wire 1 in a pickup position and move the one or more sections of wire 1 inside the apparatus along a longitudinal direction X-X of advancing movement, so as to feed them to a working unit; • - a working unit 200 for working, in particular bending, the one or more sections of wire 1, arranged downstream of the gripping and feeding unit in the longitudinal direction; • - means for operating the two gripping and feeding and working units, designed to perform synchronized steps of gripping, movement and/or working of the one or more sections of wire.
