Abstract (en)
[origin: WO2021136624A1] The invention relates to a hand-held power tool device (10a-g) for a hand-held power tool (50a), in particular an angle grinder, having at least one attachment hood (12a-g) for connection to a protective hood (14a-g) for at least partially covering a working tool (16a) of the hand-held power tool (50a). According to the invention, the attachment hood (12a-g) has at least one form-fitting element (18a-g), which is provided to interact with a collar-like, free-standing outer region (22a-g), running in a circumferential direction (20a-g), of the protective hood (14a-g) and at least contribute to the connection.
