Abstract (en)

[origin: WO2021137130A1] The invention relates to a modular group for electrical and/or home automation systems, comprising: a support frame (2) with one or more engagement seats (7); a connection module (10b) fixed in a first seat of said one or more engagement seats (7); at least one of: at least one actuator module (10a) fixed in at least one corresponding second seat of said one or more engagement seats (7) laterally adjacent to said first seat, the actuator module (10a) being laterally provided with at least one actuator module (15) first electrical contact element in electrical connection with at least one first electrical contact element (15) provided laterally on or in said connection module (10b); a power supply and/or data connection bus (203) operatively connected to said connection module (10b) through at least one further first electrical contact element (37) provided on or in said connection module (10b). The invention further relates to the connection module (10b).
