Abstract (en)
[origin: EP4086010A1] The invention provides a hanger, being a device used in surface finishing processes, in particular lacquering and metallizing of manufactured pieces, with the use of a production line. The invention discloses a construction comprising cooperating satellite gear wheels (3) along with piece grips (10), with an immovable central wheel (6) inside the housing (23), and the entire construction is mounted on a carrier element (24), being a part of a lacquering or metallizing line.
