Abstract (en)
[origin: EP4086193A1] The invention concerns a roller container (1) with an open top side for transport and storage of loose goods, comprising a floor (2), two side walls (3), a front wall (4) and a rear wall (5), and a cover system (6) for covering the open top side of the container (1), wherein said cover system (6) comprises two rotatable cover devices (7), wherein each cover device (7) is rotatable between an open position in which the cover device (7) lies against a side wall (3) of the container (1), and a covering position in which a part of the open top side is covered, wherein the top side of each side wall (3) is provided with a top tube (8) which extends over almost the complete length of the container (1), and wherein each cover device (7) comprises a U-shaped frame provided with a longitudinal part (10) with head ends and two upright fixing legs (11), wherein said longitudinal part (10) is arranged so as to be freely rotatable in the top tube (8) of a side wall (3).
