Abstract (en)

A casting mould (1) comprising a bottom part (2) of the casting mould and at least a first side mould piece (3a) and a second side mould piece (3b), which bottom part and side mould pieces are manufactured of extruded polystyrene (XPS) or expanded polystyrene (EPS), and which bottom part comprises grooves at the upper surface of the bottom part, into which the first and the second side mould pieces are formed to fit at least at one of their edges. When the first and the second side mould pieces are arranged into the grooves of the opposite edges of the bottom part the side mould pieces tilt towards each other. The casting mould can be used as a foundation mould and the foundation structure comprises the casting mould (1) according to the invention and casting compound arranged inside the casting mould.
