Abstract (en)

[origin: WO2021140200A1] Piece of jewellery comprising at least one chain (1) having two ends, at least one of the two ends comprising a hollow clip (2) attached by means of a fastening device (3), the clip (2) being formed by two half-shells (21, 22), each half-shell (21, 22) comprising an extended edge (25, 26) defining an internal hollow space of the half-shell (21, 22), the edges (25, 26) comprising notches (24) into which the chain (1) can be inserted, the half-shells (21, 22) being hinged together by a hinge (20) between a closed position in which the two edges (25, 26) are brought together to close the clip (2) and an open position in which the two edges (25, 26) are separated over at least part of their extents in order to allow a portion of the chain (1) to be introduced between the two edges (25, 26) and through the internal space, and so that the chain portion (1) is held in the clip (2) such that it cannot be extracted or translatably moved once the clip (2) is closed.
