Abstract (en)
[origin: WO2021180273A1] The present invention relates to a transport handle (1) that is able to be connected to a grating (8), wherein the transport handle (1) keeps the grating (8) away from the ground in the mounted state. The combination of several transport handles (1) and the grating (8) fastened directly thereto represents an independent and fully fledged functional unit of a load carrier (3) which can be used for the storing, loading and shipping of packages in the logistics industry.
