Abstract (en)

[origin: WO2021140198A1] In a system for producing room elements (11, 12, 16), in particular walls, from individual construction elements (1, 4, 7, 9), in particular made of wood, which are connected to one another to form the room element (11, 12, 16), at least four construction elements (1, 4, 7, 9) have different forms but are adapted to one another in terms of their dimensions. To this end, construction elements made of solid material (1) are provided and construction elements consisting of hollow elements (4), into which an insertion frame (7, 9) is inserted. The construction elements are interconnected by means of pins, which are fastened in holes in the interior of the construction elements.
