Abstract (en)
[origin: WO2021144262A1] The invention relates to methods and devices for preparing an aqueous solution of a lipophilic compound, and for preparing a lipophilic compound in water-soluble form. More particularly, the lipophilic compound can be curcumin. The lipophilic compound can further be selected from cinnamon, constituents of cinnamon, carotenoids, in particular astaxanthine, cannabis or constituents of the cannabis plant, such as cannabinoids, in particular cannabidiol.
