Abstract (en)

[origin: WO2021144331A1] The invention relates to a replaceable flavor cartridge for an aerosol-generating device. The cartridge comprises a housing and a flavor substrate. The flavor substrate is arranged within the housing. The housing comprises a proximal aperture in a proximal end face of the housing. The housing comprises a distal aperture in a distal end face of the housing. The flavor substrate comprises a substrate aperture. The proximal aperture, the distal aperture and the substrate aperture are aligned with each other to form a cartridge airflow channel through the cartridge. The invention further relates to an aerosol-generating device.
