Abstract (en)

[origin: WO2022122205A1] The invention relates to improvements in the technical field of brush manufacture. According to the invention, inter alia, a device (1) for feeding tufts of bristles (2) to receiving openings (3) in a target plate (4) is proposed, said device comprising at least one sensor (7). The sensor allows to monitor the force which a pusher drive (5) of the device (1) applies to at least one pusher pin (6) of the device (1).
