Abstract (en)
[origin: WO2021146167A1] Shipping containers and methods of reducing packaging waste arising from shipping packaged products are disclosed. A shipping container comprises a body defining a receptacle, the body being formed of a shipping container material. A lid encloses the receptacle and is formed of the shipping container material. At least one surface ornamentation is disposed on at least one of the body and the lid and a product is disposed within the receptacle. The product may not include secondary packaging and the receptacle may not include protective shipping materials. In one example, the shipping container may have a shipping configuration and a display or dispensing configuration. The shipping container may be repurposed as a serving or dispensing bowl.
