Abstract (en)

[origin: CN113133939A] The invention relates to a locking cover for a container having a neck, with a cap having breakable securing tabs. The locking cover (1) comprises a cage (6) made of plastics material; a body (7) made of plastics material which is secured around the cage (6), the body comprising a central orifice (9); a cap (10) that is configured to close the central orifice (9), the cap (10) comprising a flat head (11) for covering the orifice (9) and securing tabs (12) that are gripped between the cage (6) and the body (7). Each securing tab (12) has a breakable region (12b), and the cap (10) is made of a plastics material which is different from the plastics material of the cage (6) and from the plastics material of the body (7), the plastics material of the cap being chosen such that its breaking strength is reduced by a dose of irradiation, by gamma rays, for sterilizing the cover (1).
