Abstract (en)

[origin: WO2021144744A1] A cable fastener device (10) comprising: - a base (11) fixable to a container (100) of an electronic device, or integral with the container (100); the base (11) being crossed by a channel (12) which extends along a longitudinal direction (A) between two passage ends thereof; the channel (12) having an upper opening (13) facing (106) a bottom (14) of the channel (12); - a lid (15) configured to close the upper opening (13) so as to prevent the escape of cables; - coupling means configured to lock the lid (15) to the base (11) in a closed position wherein the lid (15) engages the upper opening (13), closing it; - a sealing member (16) configured to engage the channel (12) so as to obstruct it upon the insertion thereof into the channel (12) and the closing of the upper opening (13) by means of the lid (15) so as to prevent a passage of water and/or dust through the channel (12).
