Abstract (en)
An atomizer includes an e-liquid tank (1), an atomizing core, and an isolation member (2). The e-liquid tank includes an e-liquid chamber (105) and the atomizing core includes an at least one e-liquid inlet (301). The at least one e-liquid inlet communicates with the e-liquid chamber. The isolation member is disposed around and movable with respect to the atomizing core, and is configured to close the at least one e-liquid inlet. The isolation member comprises a pull rod (206) configured to drag the isolation member to slide away from the at least one e-liquid inlet.
