Abstract (en)
[origin: WO2021150105A1] The invention relates to a floor tile for use in a sanitary space such as a shower space, which floor tile comprises: - a plate-like body with a flat lower surface, which has a polygonal, preferably rectangular form, an upper surface arranged at a distance from the lower surface and a peripheral surface extending between the lower surface and upper surface; and - at least one upright wall which preferably lies perpendicularly relative to the lower surface and which extends along at least a first edge of the upper surface of the plate-like body, wherein at one end of the upright wall the upper surface of the upright wall lies at the same height relative to the lower surface as the first edge and wherein the height of the upper surface of the at least one upright wall increases linearly in longitudinal direction of this first edge.
