Abstract (en)

[origin: WO2021148280A1] The invention relates to a method for controlling a charging process of an electric vehicle at a charging station, the method comprising the steps of: the charging station receives a charging request from the electric vehicle connected to the charging station; the charging request is linked to a user ID; a charging process is enabled at the charging station depending on the charging request; a power request of an energy supply network is received; a power feed-back request is sent to a user terminal using the user ID; a power feed-back response is received from the user terminal; and a power feed-back process is set at the charging station depending on the power feed-back response.
