Abstract (en)

[origin: WO2021148642A1] The invention relates to a storage system (1) for storing medical products (6), in particular temperature-sensitive medical products (6), comprising a storage area (2) with a plurality of storage spaces (5) for a respective type of medical product (6) and at least one sensor for detecting an ambient parameter of the storage area (2), wherein the storage system (1) has a plurality of sensors, each of which is designed as a data logger (10) and each of which is arranged in a manner specific to the storage space, in order to automatically detect at least one storage space-specific ambient parameter, and the storage system (1) has at least one reading device (7) for reading the data loggers (10). The invention additionally relates to a method for storing medical products (6) in such a storage system (1).
