Abstract (en)

[origin: WO2021180424A1] The present invention relates to a disconnecting device, comprising: at least one contact (6), which has a first spring apparatus (13, 16) in order to form a pressing force against a counter contact (7); and a holding device (11, 12) for the contact (6), characterized in that a thermal conduction device (22, 23, 24, 25, 31, 32, 35) is designed to press the holding device (11, 12) and the contact (6) against each other. The present invention further relates to protective-gas-insulated medium-voltage power switchgear having the disconnecting device according to the invention.
