Abstract (en)

[origin: EP4094604A1] [Problem] To provide a system capable of suitably detecting bio-information on a user who uses an inhaling device. [Solution] This inhaling device comprises: an operation part that receives an operation of a user; and a bio-information detection part that detects bio-information on the user, wherein the bio-information detection part is disposed in the operation part or near the operation part.
