Abstract (en)
According to an example aspect of the present invention, there is provided a work unit, comprising a base element (9, 15), a leaning support (13) mounted on the base element (9, 15) and set on an angle in relation to the base element and configured to allow leaning to said support, a table (6) mounted on the base element at a distance from the leaning support, elbow rests (2) on both sides of said leaning support and set on an angle in relation to the base element and a mechanism for adjusting distance (20) for setting the distance between the table (6) and the elbow rests (2). Further, the work unit comprises a first shield (3) surrounding at least partially the leaning support (13) and a second shield (5) surrounding at least partially the table (6).
