Abstract (en)  
[origin: WO2021152138A1] An aerosol delivery system (110) comprising a first air passage (170a) having a first aerosol generator, and a second air passage (170b) separate from the first air passage having a second aerosol generator, wherein the first aerosol generator is operable to generate a first aerosol including an active ingredient, and the second aerosol generator is operable to generate a second aerosol including an active ingredient, the first aerosol being less visible than the second aerosol in use; and wherein the aerosol delivery system is configurable to selectively operate the first aerosol generator alone; the second aerosol generator alone; or the first and second aerosol generators together.
