Abstract (en)
[origin: WO2021151763A1] The invention relates to a locking device for a charging socket for charging an electric vehicle, comprising: an actuator, which is designed to lock the charging socket together with a corresponding charging plug in a plugged-on state; a fastening means which can be fixed or is fixed to the charging socket; and a retaining means adapted for detachably arranging the actuator on the fastening means, wherein the retaining means is arrangeable or arranged on the fastening means and is detachable from the fastening means via a relative movement between the retaining means and the fastening means. The invention furthermore relates to a charging connection for an electric vehicle.
