Abstract (en)
[origin: EP4098691A1] The purpose of the present invention is to obtain a molded article that has excellent fire-resistance and tracking resistance, that has excellent mechanical properties and hydrolysis resistance, and that is unlikely to cause bleed out even in a high-temperature and highhumidity environment. The thermoplastic polyester resin composition according to the present invention is obtained by blending, with respect to (A) 100 parts by weight of a thermoplastic polyester resin, (B) 0.1-50 parts by weight of at least one phosphinate selected from phosphinates and diphosphinates, (C) 0.1-10 parts by weight of a phosphazene compound, (D) 0.1-50 parts by weight of a nitrogen-based flame retardant, (E) 0.1-10 parts by weight of a polyfunctional epoxy compound, and (F) 0.1-20 parts by weight of an olefin resin. The ratio of the parts by weight of component (B) and the parts by weight of component (C) is 2.0-8.0.
