Abstract (en)
An object of the present invention is to provide a tank which facilitates visual confirmation of the residual quantity in the tank while suppressing cost increase irrespective of the tank capacity. The tank 4 of the present invention, which enables supply of washing liquid, includes a tank lid 6 having an inclined upper surface for covering an inlet 8a through which the washing liquid is fed, a window 5 formed in a part of the inclined surface, which enables visual confirmation of a residual quantity of the washing liquid, and a view part 5a in the window 5, which enables visual confirmation of the residual quantity of the washing liquid. The view part 5a includes a scale section 5b formed in a vertical direction to a surface of the washing liquid, which enables visual confirmation of the residual quantity of the washing liquid.
