Abstract (en)

[origin: WO2021185646A1] The invention relates to a device (2) and a method for producing a rod (4) of the tobacco processing industry, comprising a supply device (10), a separating device (12), and a rod-shaping device (20), wherein the supply device (10) is designed to supply a flat web (6) and provide same to the separating device (12) arranged downstream of the supply device (10), the separating device (12) is designed to separate the flat web (6) into a plurality of strips (14), and the rod-shaping device (20) arranged downstream of the separating device (12) is designed to form a rod (4) from the plurality of strips (14). The device (2) is improved by an embossing device (30) which is arranged between the supply device (10) and the rod-shaping device (20) and is designed to introduce an embossing into the flat web (6) or a plurality of the strips (14).
