Abstract (en)
[origin: WO2021156042A1] The invention relates to a sawing facility (100) having a rail guide (12) which defines a longitudinal direction (14), a saw (10) which is arranged on the rail guide (12), a first sawing material feed (16), a second sawing material feed (18), a first carriage (20) which comprises a first sawing material support (22) and a first carriage drive (24), and a second carriage (32) which comprises a second sawing material support (34) and a second carriage drive (36), wherein the first sawing material feed (16) is designed to transfer a first sawing material (28) onto the first sawing material support (22); the second sawing material feed (18) is designed to transfer a second sawing material (38) onto the second sawing material support (32); the first carriage drive (24) is designed to move the first carriage (20) together with the first sawing material (28) past the saw (10) along the longitudinal direction (14) on the rail guide (12) in order to saw the first sawing material (28) in the longitudinal direction (14); and the second carriage drive (36) is designed to move the second carriage (32) together with the second sawing material (38) past the saw (10) along the longitudinal direction (14) on the rail guide (12) in order to saw the second sawing material (38) in the longitudinal direction (14).
