Abstract (en)

[origin: WO2021156459A1] ABSTRACT The present invention relates to a conveyor for conveying products, in particular fruit products or vegetable products, the conveyor comprising a frame, a conveyor track defining a conveying direction, a plurality of conveying assemblies, the conveying assemblies being 5 moveable along the conveyor track in the conveying direction, each conveying assembly comprising a product support for supporting an individual product during conveying, a first rotation mechanism configured to rotate the product on the product support about a first product rotation axis, a second rotation mechanism configured to rotate the product on the product support about a second product rotation axis which extends transverse to the first 10 product rotation axis, a conveying drive configured to move each conveying assembly in the conveying direction.
