Abstract (en)

[origin: WO2021156314A1] An adaptive pile driver system for driving a pile at a worksite. The system comprises a pile driver comprising a motor, an electrical power unit, a drill rod with a first end and a second end. The system further comprises a vibrating module, a hammering module, a drilling module, and a rock drilling module. The pile driver is adaptable to the worksite where the pile is to be driven, by connecting one or more of pile driver modules to the drill rod.
