Abstract (en)

In order to provide a spun yarn take-up apparatus lower in floor level than a conventional apparatus, the spun yarn take-up apparatus comprises a spun yarn take-up unit 6 for taking up and drawing a plurality of yarns 100 spun from a spinning machine, and a spooling unit 8 for winding the plurality of yarns 100 delivered from the spun yarn take-up unit 6 to form a wound package. The spun yarn take-up unit 6 includes: a first guide section 10 for guiding the plurality of yarns 100 downstream along a yarn traveling direction; and a drawing section 28 including a plurality of rollers having at least one roller for drawing the plurality of yarns 100 guided by the first guide section 10; and a second guide section 62, 70 for guiding the plurality of yarns 100 from the drawing section 28 to the spooling unit 8. The spooling unit 8 and the drawing section 28 are arranged horizontally. The second guide section has a second relaxing roller 62 and the distribution section 70. The plurality of yarns 100 from the drawing section 28 are delivered to the spooling unit 8 through the distribution section 70 and the second relaxing roller 62.
