Abstract (en)

[origin: EP4102015A1] Hinge for a window or door with a hinge leaf (6) and associated accessory (11) intended to be mounted between the hinge leaf (6) and a profile (2,3) of a window or door on which the hinge leaf (6) is fastened, whereby the thickness (D) of the accessory (11) is adjustable and is composed of two essentially plate-shaped parts (11 a and 11b), which are affixed against one another by one side and on said sides are provided with interlocking complementary toothings (11c, 11d) which are such that when both parts (11a and 11b) are slid in a sliding direction in one or another direction relative to each other, the thickness (D) of the accessory (11) increases or decreases characterised in that the hinge leaf (6) and the plate-shaped first part (11a) of the accessory (11) on the facing sides in contact therewith are provided with protrusions (12) and complementary recesses (13) with which they interlock.
