Abstract (en)
[origin: WO2021162557A1] A valve, and a related cage, pipeline, and method. In various examples, the valve has a body, a channel in the body for passing fluid through the valve, a cage arranged to be movable by actuation between positions, so that in one position one section of the cage extends across the channel and in another position another section of the cage extends across the channel, and a valve member arranged to be movable inside the cage for opening or closing the valve.
