Abstract (en)  
[origin: WO2022233525A1] The present invention relates to a redundant power supply (1) comprising: a first power supply (10) which can be connected to a busbar (100) by means of a first bus-tie breaker (15) and is detachably connected to a first load (L1) by means of a first line system (12); a second power supply (20) which can be connected to the busbar (100) by means of a second bus-tie breaker (25) and is detachably connected to the first load (L1) by means of a second line system (22); a third power supply (30) which can be connected to the busbar (100) by means of a third bus-tie breaker (35) and is detachably connected to a second load (L2) by means of a third line system (32); and a fourth power supply (40) which can be connected to the busbar (100) by means of a fourth bus-tie breaker (45) and is detachably connected to the second load (L2) by means of a fourth line system (42). All of the bus-tie breakers (15, 25, 35, 45) are open under normal operating conditions.
