Abstract (en)
[origin: WO2021188081A1] A system enabling to verify the phone number (MSISDN) information of the user who connects to the internet via the Internet Service Provider (ISP) (2) to which this Gateway is connected, through a Wired/Wireless Gateway (6) using a Mobile Device (1) with a SIM Card (5) inserted and actively connected to the GSM Mobile Network, comprising a GSM Operator (4), a Internet Service Provider (ISP) (2), a Mobile Device (1), a SIM card (5) inserted to the Mobile Device (1), GSM Operator SIM Management Platform (4.1) that sends the request to connect to the URL containing single-use tracking/reference information to the SIM card (5) inserted in the mobile device (1) with a trigger mode, the User Verification Platform (3) that enables the verification of the user phone number (MSISDN) information by controlling the tracking/reference information, IP/PORT information and all other information that is limited or completely identifying the Mobile Device (1) via the Internet Service Provider (ISP) (2) and the database (3.1) storing the tracking/reference information, IP/PORT information and all other information that is limited or completely identifying the Mobile Device (1).
