Abstract (en)

[origin: EP4104690A1] Disclosed are an atomizer (100) and an aerosol generation apparatus with the atomizer (100). The atomizer (100) comprises a liquid storage part (10), a base (20) arranged at an end of the liquid storage part (10), and a vapor output pipe (11) arranged in the liquid storage part (10). The atomizer (100) further comprises a connecting part (30) arranged between the base (20) and the vapor output pipe (11), wherein an air intake pipe (261) is arranged in a protruding manner on the base (20), and the side of the connecting part (30) close to the vapor output pipe (11) is recessed to form a first collecting tank (311). In the atomizer (100), the connecting part (30) is arranged between the base (20) and the vapor output pipe (11), and corresponding to the vapor output pipe (11), the connecting part (30) is provided with the first collecting tank (311), such that condensate generated in the vapor output pipe (11) or an aerosol-forming substrate leaked from the atomizer (100) is collected in the first collecting tank (311), the aerosol-forming substrate is prevented from leaking to the outside of the aerosol generation apparatus from the air intake pipe (261), thereby preventing liquid leakage, and achieving good user experience.
