Abstract (en)

[origin: US2022080755A1] The invention relates to a label printer for printing self-adhesive linerless endless tape labels, said label printer comprising a printhead and a driven print roller, wherein the endless tape labels can be led along a label track between the printhead and the print roller; and a stripping element for stripping off the labels from the print roller, said stripping element being connected downstream of the print roller in a transport direction of the endless tape labels, wherein the print roller is replaceably inserted into a print roller receiver of the label printer and is captively held in the print roller receiver by the stripping element.
