Abstract (en)

The present invention relates to concentrates to be diluted with water for hard surface cleaning purposes, in particular manual dishwashing purposes, comprising at least one fatty alcohol ether sulfate and at least one betaine in a weight ratio in the range of about 40:60 to about 65:35 in an amount of fatty alcohol ether sulfate and betaine together of about 25 to about 50 wt.-%, and further at least one alkyl polyglycoside in an amount of about 2 to about 15 wt.-%. The present invention further relates to the use thereof as well as to a method of preparation, which comprises diluting the concentrate with water.
