Abstract (en)
The invention provides a trough (1) for an ironing device, comprising:- a first heat-conducting plate (2); and- a second heat-conducting plate (3), wherein both heat-conducting plates (2, 3) are coupled to one another, preferably by means of weld spots (6) and/or weld seams (7), and wherein the first heat-conducting plate (2) and/or the second heat-conducting plate (3) are/is deformed in such a way that a cavity (5) is provided between the two plates (2, 3), wherein the surface of the first heat-conducting plate facing the cavity (5) is convex; and is provided with recessed elements (4), wherein the recessed elements (4) are blind holes.
